- 1 Our Services
- 1 Personnel Update
- 1 Recent Installations
- 1 New KMA Target System
- 2 Maintenance for Forensic Buddy®
- 2 NRA RDOC

*“Assistant Director of
Operations”*

“New Target System”

Our Services

Savage Range Systems offers total range solutions for the finest, safest, and cleanest, lowest-maintenance shooting ranges, bullet traps, steel target systems, and 360-degree shoot houses. Bullet traps utilizing wet **Snail®** technology, combined with low angle ramps and 360-degree deceleration chambers, safely capture bullets while virtually eliminating splatter, ricochet and airborne lead. Specializing in custom systems, including fully-automatic .50cal BMG, **Savage** is the choice for military and law enforcement agencies nationwide, commercial and private shooting ranges, and for virtually every firearms and ammunition manufacturer.

Personnel Update

Damian Romitti has joined us in the newly created position of **Assistant Director of Operations**. Prior to joining **Savage Range Systems**, Damian spent over 15 years in high technology environments with **Pratt & Whitney Aircraft** and **United Technologies**. He has an extensive project management background and holds an MBA from **Indiana Wesleyan University**.

Recent Installations

Recently installed traps and ranges include:

- Smokehouse Trail Police
- Tulsa Crime Lab
- Goodfellow AFB
- Missouri Department of Conservation
- Pro Mag Industries
- Taurus
- Kings Bay NSB

New KMA Target System

Our new **Overhead Target Retrieval System** was well received at the SHOT Show. For pictures and details regarding the **KMA**, please visit our website at www.SavageRangeSystems.com

Maintenance for Forensic Buddy®

Suggested additional maintenance for **Forensic Buddy®** users:

- The inside of the red housing should be wiped out periodically to prevent the buildup of green powder. We recommend cleaning the unit after 20 rounds. This frequency should be increased if you are firing large volumes of traditionally “dirty” calibers.
- After 50-60 rounds, we recommend washing the media in a bucket of D-Lead solution. This will remove any grit / powder that has been deposited on the media. After washing the media in the D-Lead it should be rinsed in clean water and allowed to dry. The D-Lead solution can be reused many times.

NRA RDOC

The next **NRA Range Development and Operations Conference** will be held in Portland, OR, June 12th -16th.

This provides an excellent opportunity for existing and prospective range operators to expand their knowledge regarding building and maintaining a shooting facility.

Topics covered include:

- Developing business and master plans
- Public hearings and zoning boards
- Environmental sound
- Insurance
- Range maintenance
- Range safety

For more information, contact **Kara Schlifke** at KSchlifke@nrahq.org or 703-267-1276.
